

# NO DECISION GIVEN

By the Arbitrators in the Differences Between Two Railroads.

## OHIO RIVER AND PENNSYLVANIA.

The Arbitrators Met in Mr. Walcott's Private Car in the Morning and Considered the Controversy at Great Length—Their Decision Will be Given Out in the Near Future—A Principle in Railroadings is Involved.

Yesterday morning the three arbitrators in the settlement of the differences between the Powikewy and Ohio River railroad companies, ex-Governor A. B. Fleming, of Fairmont; Mr. C. C. Walcott, of Toledo, an official of the Wheeling & Lake Erie, and Mr. Lee, of the Baltimore & Ohio road, met, as had been exclusively announced in yesterday's INTELLIGENCER, and heard the two sides to the controversy. The meeting was held in Mr. Walcott's private car in the Baltimore & Ohio yards and lasted several hours, the matter being gone into at length by the representatives of the two companies. The Powikewy was represented by Chief Engineer M. J. Becker, of Pittsburgh, while the Ohio River's interests were taken care of by Superintendent C. L. Williams and Chief Counsel V. B. Archer, of Parkersburg.

As before stated the difficulty was what part of the cost of the steel railroad bridge over Wheeling creek should be borne by the Ohio River Company. The bridge was constructed by the Powikewy and that company insisted that the Ohio River should pay for it in proportion to the amount of traffic, as provided for in the perpetual lease between the two companies in the case of "repairs." On the other hand the Ohio River representatives claimed that the bridge comes under the head of betterments for which the lease agreement provides that the Ohio River shall pay three per cent. After the case had been thoroughly reviewed at length the arbitrators agreed not to come to an agreement yesterday. They decided to take the matter under consideration and report their decision to the parties interested at a future day. All of the visitors left the city for their homes yesterday afternoon. The case is attracting considerable attention in railroad circles, for, although the amount involved is not great, the questions involved form a principle in railroad affairs that will be settled permanently, and guide in future controversies.

### GOV. STONE'S MESSAGE.

Among Other Things He Suggests are Increased Appropriations for the State Militia.

St. Louis, Jan. 4.—Governor Stone in his message to the legislature at Jefferson City to-day asks among other things for an increased appropriation for the support of the national guard. In this connection he says: "The maintenance of a fairly well equipped militia is not only in conformity to our theory of government, but it is a positive necessity. The presence of an adequate and efficient force of the kind removes all excuse for the employment of the regular army in purely domestic affairs. It was never intended by the fathers that the federal military should be used, without invitation, to do, or aid in doing, those things which are incumbent upon the police or civil authority of the states. The theory of our government contemplates that our chief reliance for a military force shall be upon the militia, which is a national as well as a state organization. It is always to be greatly hoped that there will be no need to employ the military but when the necessity does arise, it is often of the highest moment. The present force is not large, although I think large enough to meet any probable contingency."

He recommends, among other things, the establishment of a board of pardons and inspection; the establishment of agencies and means for properly advertising the resources of Missouri with a view to inducing immigration; the cession to the United States of certain lands to be used by the general government in connection with the improvements of the Osage river, and a movement to secure, in connection with other state assemblies, uniformity of legislation.

Indictments Against Debs Argued.

Chicago, Jan. 4.—Judge Grosscup, in the United States court, began hearing arguments to-day on motion to quash indictments in the cases against President Debs and other officials of the American Railway Union. Arguments for the defendants were made by T. W. Harper, of Terre Haute, Ind., and S. S. Gregory, of Chicago. The arguments for the government were made by ex-District Attorney T. E. Michrist and Attorney M. Rosenthal. The arguments were completed this afternoon and a decision will be rendered next Tuesday.

### THE CITY'S HEALTH.

Compares Favorably With That of Other Cities—The Low Mortality Rate.

To the Editor of the Intelligence.

Sir:—In submitting my annual report of vital statistics for the city of Wheeling for the year ending December 31, 1894, it affords me great satisfaction to say that the annual death rate of 13.65 is the lowest ever published since this office was established in 1893, and is lower than that of other cities having the same population in this country, with one or two exceptions, and much lower than the rate of similar cities in Europe.

This certainly is very gratifying to every person in the city of Wheeling. It shows that the efforts made by the health department are meeting with success; that the enforcement of sanitary measures, (notwithstanding that they pinch severely sometimes) are telling in the right direction. Lowering the death rate is the direct result, and the great benefit we receive from rigid enforcement of strict sanitary regulations. The sanitary laws of this city are only tolerably good. Many features of our regulations need overhauling and amending, and until this is done we must suffer from this source.

Diphtheria, the most dreadful of all diseases, continues to ravage, carrying off annually a very large number of our young citizens. This will continue until our regulations will allow us to quarantine every infected house, and in case of death from contagious or infectious disease, to compel the dead to be interred immediately, and privately, and no funeral. Several instances in this city occurred during the last year, where funerals of persons dying from diphtheria were followed by one or two more deaths, contracted at the funerals.

Notwithstanding our apparent neglect of duty in this city, our death rate for diphtheria is lower than that of many other cities of America.

The death rate for the state of New York for 1894 was eighty-nine in 100,000. Our death rate is thirty-one in 40,000, which is a good showing. Again, diphtheria occurs mostly in the cities, and our rate is from the city alone, while New York is from the entire state. We are frequently asked why it is that we do not have in Wheeling the new remedy, anti-toxine, and some of our people feel that physicians of this city are not as energetic in this direction as circumstances require. Our daily papers continue to print reports from interior towns where medical men have treated thirty, and even forty, consecutive cases, without the loss of a single case, by the use of the new remedy. Physicians here are naturally very sceptical with regard to these reported cases in our daily papers, and regard them as the merest fabrications.

The city of Washington, D. C., has as good a health department to be found in America. They also have as good physicians as are found anywhere. They have the new remedy, anti-toxine, introduced there in the early fall. During the month of November they had in that city thirteen cases of diphtheria. Cultures were made in every case and the Clobs Loeffler bacillus located. Each case was treated with the new remedy, under the most careful management, by the most skillful physicians. Eleven of these cases died, two recovered. Our physicians here have had much better success without anti-toxine than the city of Washington has had, with it. The final criterion of the efficacy of the new remedy, in the treatment of diphtheria, is experience, and the results that come to us from the very highest medical authorities are conflicting. It will certainly be a great disappointment if, after all that has been said and done, the new remedy for this dreadful disease would fall short of its high expectations.

Respectfully,

J. W. McCoy.

"C. T. Hood & Co., Lowell, Mass.:

### Don't

Don't imagine for a moment that happiness depends upon surroundings. It is more often the result of disposition.

Don't deceive yourself by thinking you can succeed or be happy with a bad disposition. You cannot.

Don't make the mistake of thinking you can have an amiable disposition if you have bad health, or if there is anything deranged about your system.

Don't misunderstand the cause of bad feelings, irregular pains, weaknesses and depressions. They all have a common cause.

Don't doubt what so many eminent persons have declared, that there is one great cause for most of the troubles of men and women—deranged kidneys.

Don't deceive yourself by allowing these things to run along. Take them in time and by the best and most scientific manner possible.

Don't let anyone deceive you. There is only one great remedy known to the world for the cure of kidney and liver troubles. That remedy is Warner's Safe Cure.

Don't hesitate to use it promptly and constantly, so long as you feel any of the troubles above described. It is certain to keep you and prove "a friend in need."
